

BIS 527

Introduction to Health Data Science

Translating real-world public health problems into precise questions, applying appropriate analytical tools, and communicating findings effectively.

LECTURE SCHEDULE

Tue & Thu 3:00–4:20 PM

Winslow Auditorium · LEPH Room 109 · 60 College St, New Haven, CT

Data Structures & Algorithms

Machine Learning & AI

Causal Inference

WHO SHOULD ENROLL

MPH, Undergrads & Grad Students

Open to MPH (quant. focus), advanced undergrads, and Stats & DS / CS grad students — also required for Biostatistics MS/PhD

FORMAT

Lecture-Based

Case studies and hands-on labs are built into class sessions — no separate lab or discussion sections

LANGUAGE

Python

NumPy, Pandas, Scikit-learn, PyTorch

Questions? Reach out before add/drop closes.
